VISION	MISSION
To be recognized for excellent engineering, developing global leaders both in educational and research in the domain of computer science and wireless engineering.	1. To create self-learning environment by facilitating leadership qualities, team spirit and ethical responsibilities. 2. To improve department-industry collaboration, interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

Experiment No. 01

Aim: - Installation of JDK & write a simple program to display "Hello World".

Software Requirement: - Java Development Kit (JDK), Integrated Development Environment (IDE) (NetBeans), Java Runtime Environment (JRE).

Theory: -

Setting up a Suitable Development Environment is necessary before one can begin creating any applications. It makes it easier for developers to use the tools required to create any Application and ensures that all Operations or Processes run smoothly. Download and Install JDK in order to create Android Application Source Files using the Java or Kotlin Programming Language. The system will execute the code using a set of Libraries and Compilers.

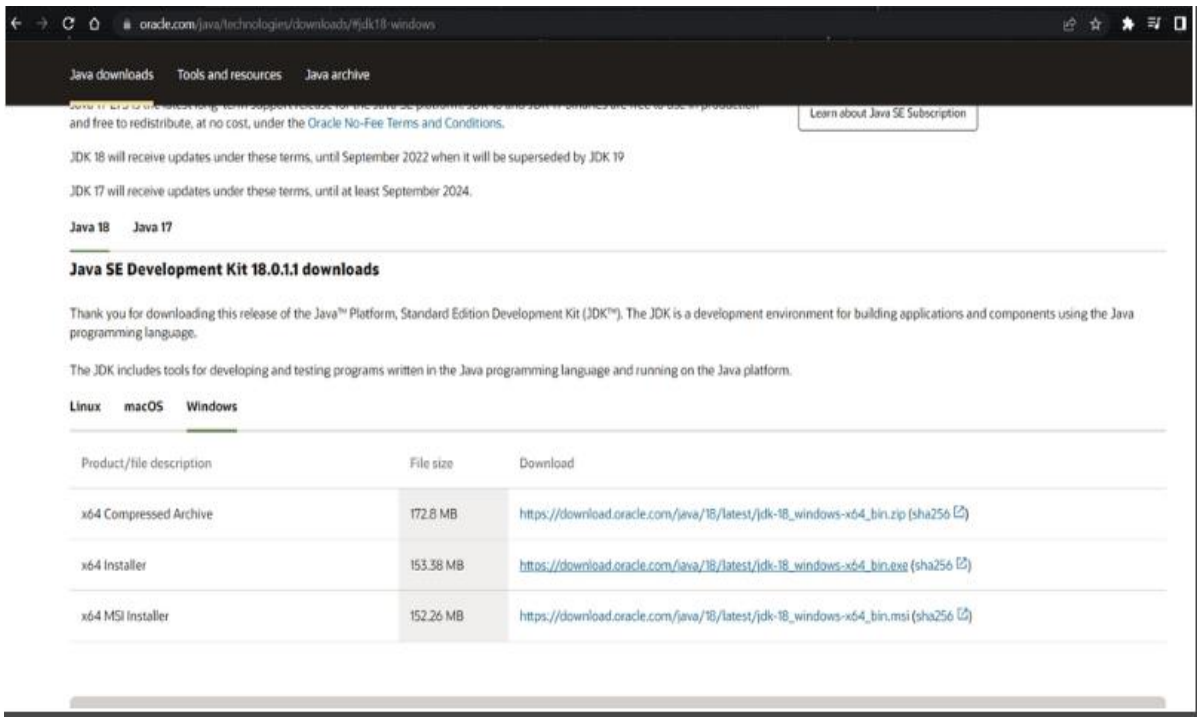
Install JDK on Microsoft Windows

Follow the below steps to install JDK on Windows environment. The below steps works on every Windows like **Windows 7, Windows 8, Windows 8.1, Windows 10**, and **Windows 11**. So, whatever Windows ytou are running in your system just go through the step to install Java Development Kit.

Step 1: Download and Install Java Development Kit (JDK)

The very first step is to download the **Oracle Java Development Kit (JDK)** from the Official Oracle Website. For that, Head over to the Official Website.

VISION	MISSION
To be recognized for excellent engineering, developing global leaders both in educational and research in the domain of computer science and wireless engineering.	1. To create self-learning environment by facilitating leadership qualities, team spirit and ethical responsibilities. 2. To improve department-industry collaboration, interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

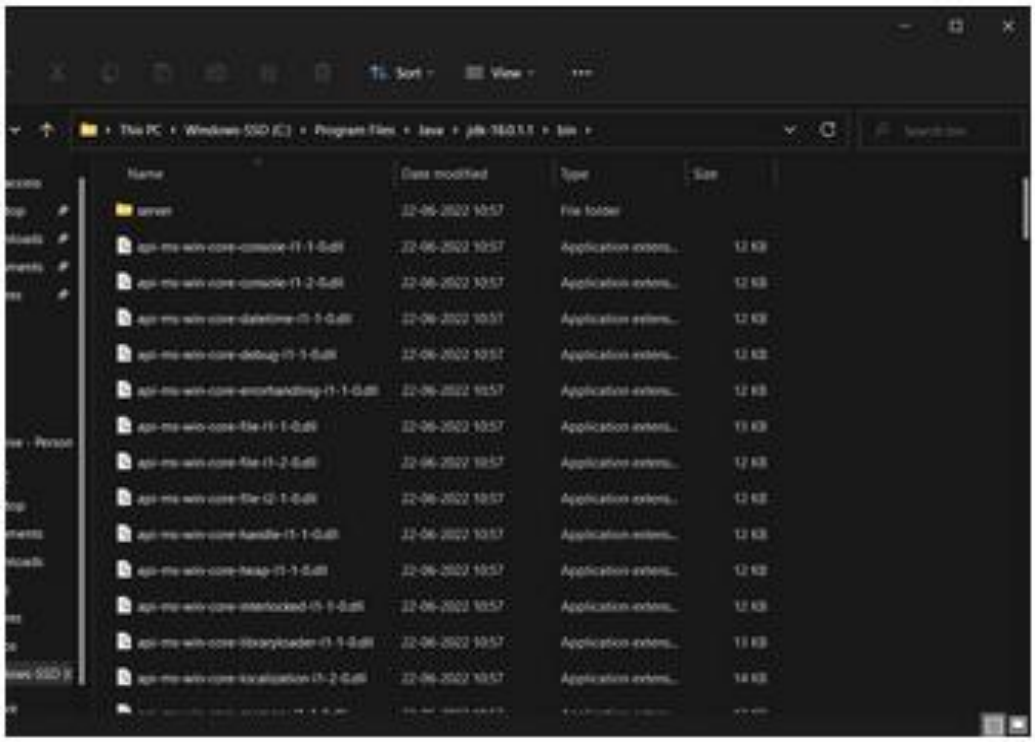


You need to identify your system specifications to choose the Product/file description. The website will contain the latest version for your corresponding system. For Windows, we'll be downloading the latest **x64 Installer of Java SE Development Kit 18.** After the download is complete, proceed to install the JDK by following the bootstrapped steps.

VISION	MISSION
To be recognized for excellent engineering, developing global leaders both in educational and research in the domain of computer science and wireless engineering.	1. To create self-learning environment by facilitating leadership qualities, team spirit and ethical responsibilities. 2. To improve department-industry collaboration, interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

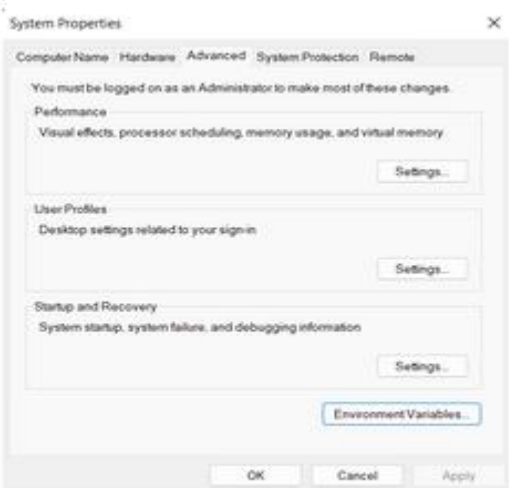
Step 2: Configure Environment Variables

After the installation is complete, we have to configure environment variables to notify the system about the directory in which JDK files are located. Proceed to **C:\Program Files\Java\jdk-**{YOUR_JDK_VERSION}**\bin** (replace {-} with your JDK version)

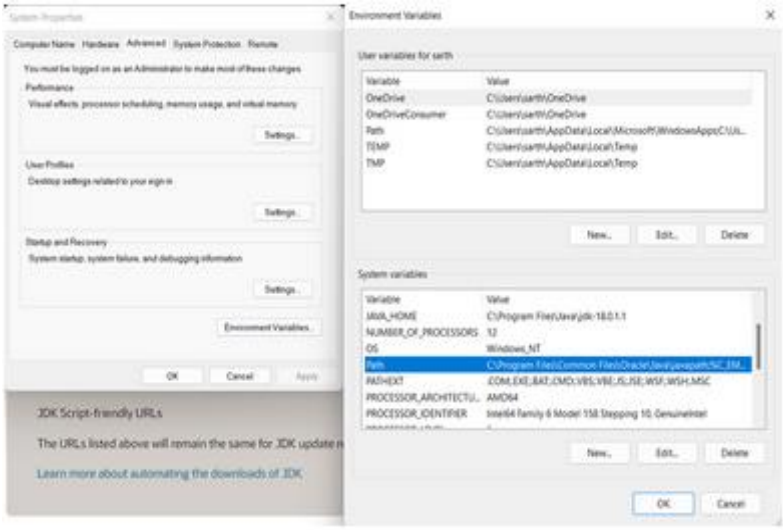


To set the Environment Variables, you need to search Environment Variables in the Task Bar and click on **"Edit the system environment variables"**.

VISION	MISSION
To be recognized for excellent engineering, developing global leaders both in educational and research in the domain of computer science and wireless engineering.	1. To create self-learning environment by facilitating leadership qualities, team spirit and ethical responsibilities. 2. To improve department-industry collaboration, interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

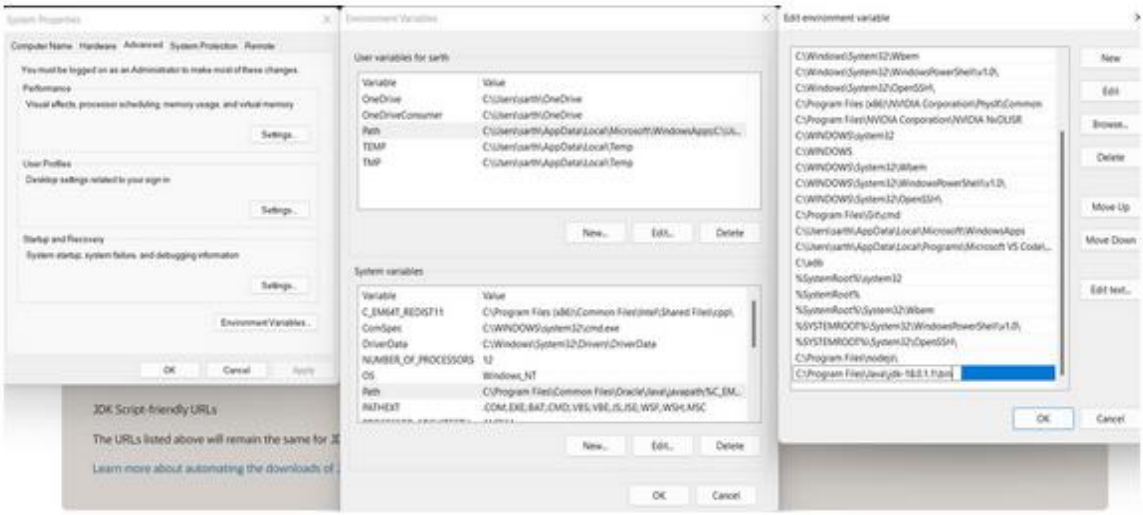


Under the **Advanced** section, Click on **"Environment Variables"**.

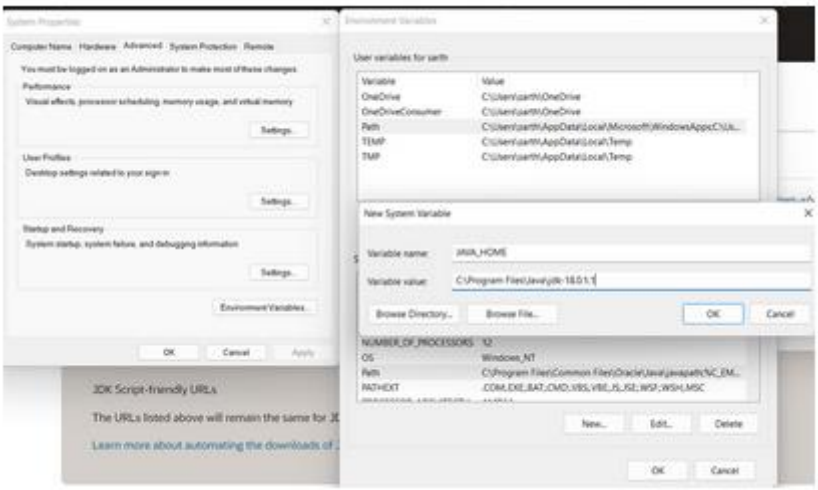


Under **System variables**, select the **"Path"** variable and click on **"Edit"**. Click on **"New"** then paste the Path Address i.e. **C:\Program Files\Java\jdk-**{YOUR_JDK_VERSION}**\bin**. Click on **"OK"**.

VISION	MISSION
To be recognized for excellent engineering, developing global leaders both in educational and research in the domain of computer science and wireless engineering.	1. To create self-learning environment by facilitating leadership qualities, team spirit and ethical responsibilities. 2. To improve department-industry collaboration, interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.



Now, in the **Environment Variables** dialogue, under **System variables**, click on **"New"** and then under **Variable name: JAVA_HOME** and **Variable value:** paste address i.e. **C:\Program Files\Java\jdk-**{YOUR_JDK_VERSION}. Click on **OK => OK => OK**.

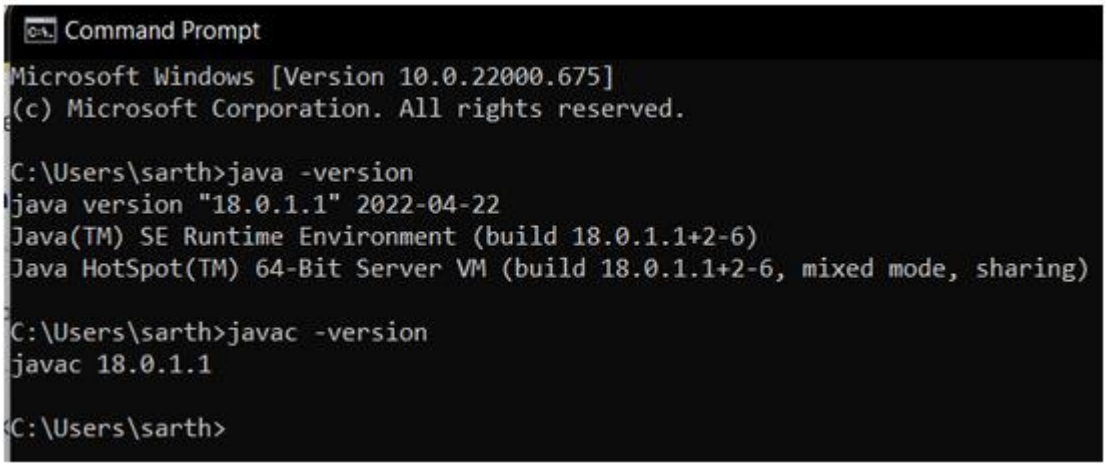


Step 3: Check the Java Version

Open **Command Prompt** and enter the following commands

```
java -version
javac -version
```

VISION	MISSION
To be recognized for excellent engineering, developing global leaders both in educational and research in the domain of computer science and wireless engineering.	1. To create self-learning environment by facilitating leadership qualities, team spirit and ethical responsibilities. 2. To improve department-industry collaboration, interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.



Simple Program to Display "Hello World".

Program:

```
class Test
{
   public static void main(String []args)
   {
      System.out.println("Hello World.");
   }
};
```

Output:

Hello World

Conclusion:

Hence, thus we Install of JDK & write a simple program to display "Hello World" Successfully.
