NVIDIA

The way it's meant to be played

Overview

•**Founded:** April 5, 1993
•**Founders:** Jensen Huang, Chris Malachowsky, Curtis Priem
•**Headquarters:** Santa Clara, California, USA
•**Industry:** Semiconductor, Artificial Intelligence, Gaming, Data Centers

Foundation & Early Growth (1993-1999):

•Founded in 1993, Nvidia introduced its first major GPU, **GeForce 256 (1999)**, revolutionizing graphics.

•Expansion & Market Leadership (2000-2010):

•Acquired **3dfx (2000)** and launched **CUDA (2006)**, enabling GPUs for AI and scientific computing.
•Entered the mobile market with **Tegra (2008)** and led gaming with **GeForce FX & Tesla GPUs**.

AI & Deep Learning Revolution (2011-2020):

•Focused on AI, cloud computing, and autonomous vehicles.
•**RTX series (2018)** introduced real-time ray tracing, reshaping gaming and AI applications.

Dominance in AI & Future Technologies (2021-Present):

•**Hopper & Blackwell architectures** advanced AI computing.
•Expanding in **cloud, metaverse, and autonomous systems**, making Nvidia a trillion-dollar company.

Business & Economic Impact

•**Revenue:** $26.97 billion (FY 2023)
•**Market Cap:** $3.28 trillion (2024)
•**Key Sectors:** Gaming, AI, Data Centers, Automotive, Cloud Computing
•**Competitors:** AMD, Intel, Qualcomm

Future Vision

•Advancing AI and deep learning applications.
•Expanding into quantum computing and robotics.
•Strengthening its role in cloud gaming and data centers.
