JAIDEV EDUCATION SOCIETY'S
J D COLLEGE OF ENGINEERING AND MANAGEMENT
KATOL ROAD, NAGPUR
Affiliated to Dr. Babasaheb Ambedkar Technological University, Lonere
Website: www.jdcoem.ac.in E-mail: info@jdcoem.ac.in
An Autonomous Institute, with NAAC "A" Grade
Department of Artificial Intelligence
"A Place to Learn, A Chance to Grow"
Session-2024-25

VISION	MISSION
To be recognized as an Excellent Innovative Engineering Department through Academic Programme which develops leaders in Education and Research in Computer Science	1. To create self-learning environment by facilitating leadership qualities, team-spirit and ethical responsibilities. 2. To strengthen department-industry collaboration and interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

Question Bank

Branch: - Artificial Intelligence Semester / Year: - VI Sem /2nd Year

Subject: - Engineering Economic Subject Code: - AI4H002

==========

UNIT 1: Introduction: Micro and Macro Economics

☑ 2 Marks

1. Define Microeconomics and Macroeconomics.
2. State any two economic laws.
3. Name any two basic economic problems.
4. List any two economic terms.
5. Identify two areas where engineering relates to economics.

☑ 4 Marks

1. Distinguish between Microeconomics and Macroeconomics with examples.
2. Explain the nature of economic laws with suitable illustrations.
3. Analyze the relationship between Engineering and Economics.
4. Describe how economics is related to other subjects.

☑ 7 Marks

1. Compare and contrast the characteristics of micro and macroeconomics with real-life examples.
2. Illustrate how engineering principles are applied in solving economic problems.

VISION	MISSION
To be recognized as an Excellent Innovative Engineering Department through Academic Programme which develops leaders in Education and Research in Computer Science	1. To create self-learning environment by facilitating leadership qualities, team-spirit and ethical responsibilities. 2. To strengthen department-industry collaboration and interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

☑ 12 Marks

1. Assess the significance of economic laws in real-world decision-making.
2. Justify the role of economic analysis in engineering projects with suitable case studies.

UNIT 2: Demand and Supply

☑ 2 Marks

1. Define demand.
2. What is demand elasticity?
3. Name two techniques of demand forecasting.
4. State the Law of Supply.
5. What is meant by price fixation?

☑ 4 Marks

1. Explain any two types of elasticity of demand with examples.
2. Discuss the factors affecting demand.
3. Illustrate how demand and supply influence price determination.
4. Describe two practical applications of elasticity.

☑ 7 Marks

1. Compare different types of elasticity and their impact on business decisions.
2. Analyze the importance of demand forecasting for a manufacturing firm.

☑ 12 Marks

1. Evaluate various techniques of demand forecasting and recommend the best suitable method for a new product.
2. Assess how understanding elasticity can improve pricing strategy in competitive markets.

VISION	MISSION
To be recognized as an Excellent Innovative Engineering Department through Academic Programme which develops leaders in Education and Research in Computer Science	1. To create self-learning environment by facilitating leadership qualities, team-spirit and ethical responsibilities. 2. To strengthen department-industry collaboration and interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

UNIT 3: Production

☑ 2 Marks

1. Name the four factors of production.
2. Define break-even point.
3. State the Law of Variable Proportions.
4. What is depreciation?
5. Define internal economies of scale.

☑ 4 Marks

1. Explain the concept of break-even analysis with a simple graph.
2. Differentiate between internal and external economies of scale.
3. Discuss the impact of depreciation on production costs.
4. Apply the law of variable proportions to agricultural production.

☑ 7 Marks

1. Analyze the factors influencing production decisions in a manufacturing firm.
2. Examine the role of economies of scale in reducing production costs.

☑ 12 Marks

1. Evaluate the usefulness of break-even analysis in managerial decision-making.
2. Propose a production strategy for a start-up using the concepts of cost and scale economies.

VISION	MISSION
To be recognized as an Excellent Innovative Engineering Department through Academic Programme which develops leaders in Education and Research in Computer Science	1. To create self-learning environment by facilitating leadership qualities, team-spirit and ethical responsibilities. 2. To strengthen department-industry collaboration and interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

UNIT 4: Indian Economy

✅ 2 Marks

1. Define monetary policy.
2. What is LPG in the context of Indian economy?
3. Name two world economic bodies.
4. Define inflation.
5. State any two features of Indian Economy.

✅ 4 Marks

1. Explain the difference between fiscal and monetary policy.
2. Describe the impact of inflation on the common man.
3. Discuss any two features of the Indian economy post-LPG reforms.
4. Explain the role of banking in Indian economic development.

✅ 7 Marks

1. Analyze the impact of LPG reforms on Indian industries.
2. Examine the roles of IMF and World Bank in shaping Indian economy.

✅ 12 Marks

1. Assess the effectiveness of fiscal and monetary policies in controlling inflation in India.
2. Evaluate the challenges and opportunities in the Indian economy in the post-globalization era.

VISION	MISSION
To be recognized as an Excellent Innovative Engineering Department through Academic Programme which develops leaders in Education and Research in Computer Science	1. To create self-learning environment by facilitating leadership qualities, team-spirit and ethical responsibilities. 2. To strengthen department-industry collaboration and interaction with professional society through technical knowledge and internship program. 3. To promote research and development with current techniques through well qualified resources in the area of computer science and wireless engineering.

UNIT 5: Enterprise and MSMEs

☑ 2 Marks

1. Define enterprise.
2. State any two sources of finance for MSMEs.
3. What are the factors required for the growth of enterprise?
4. Name any two institutions supporting MSMEs.
5. What is meant by self-employment?

☑ 4 Marks

1. Discuss the scope of self-employment opportunities in India.
2. Explain the role of institutions in promoting MSMEs.
3. List and explain any two sources of finance available to MSMEs.
4. Illustrate how entrepreneurship contributes to economic development.

☑ 7 Marks

1. Analyze the challenges faced by MSMEs in India.
2. Examine the significance of financial support for start-ups and MSMEs.

☑ 12 Marks

1. Design a growth plan for a micro-enterprise including funding and institutional support.
2. Evaluate the role of entrepreneurship in transforming local economies and generating employment.
