```java
interface Human {
    void learn(String str);
    void work();

    int duration = 10; // This is implicitly public, static, and final
}

class Programmer implements Human {
    public void learn(String str) {
        System.out.println("Learn using " + str);
    }
    public void work() {
        System.out.println("Develop applications");
    }
}

class HumanTest {
    public static void main(String[] args) {
        Programmer trainee = new Programmer();
        trainee.learn("coding");
        trainee.work();

        // Accessing the interface constant
        System.out.println("Training duration: " + Human.duration + " days");
    }
}
```
