

Name of Activity: Open Book Test

Name of Faculty: Prof. Gajanan Wankhade

Open Book Test Questions

Sr. No.	Question	Level/CO
1	Differentiate between RISC and CISC architectures with reference to AVR microcontrollers.	L4/CO3
2	Describe the architecture of the AVR family microcontrollers with a neat block diagram. Explain the role of CPU, ALU, and control unit.	L2/CO3
3	Explain the fundamental features of ARM processors and discuss why they are widely used in embedded systems.	L2/CO4
4	Explain the interrupt handling mechanism in ARM processors. Describe different types of interrupts.	L2/CO4
5	Explain the concept of localization in robotics. Discuss different techniques used for robot localization.	L2/CO5
6	Describe robotic perception and discuss the role of sensors and AI techniques in enabling robots to interpret their environment.	L2/CO5
