

Computer Forensic Question Bank

2 Marks

- 1 Define Digital Forensics.
- 2 List out steps involved in handling Electronic Media.
- 3 Restate the term Cryptography.
- 4 Define Cardinal Rules of Forensics.
- 5 Define Cyber Law.
- 6 List out types of File Systems used in Windows OS.
- 7 Restate the definition of FAT File System.
- 8 Define Anti-Forensics.
- 9 Define Computer Artifact.
- 10 List out UNIX file systems.
- 11 Restate the meaning of OS Artifact.
- 12 Define Vulnerability Assessment.
- 13 Define Hacking.
- 14 List out Security Laws in India.
- 15 Restate importance of Security Assurance.
- 16 Define Digital Investigation.
- 17 State any two types of Cyber Crimes.
- 18 Rewrite the definition of Hacking.
- 19 Write the full form of IPR
- 20 State the use of Disk Imaging.
- 21 State any two International Standards for Information Security
- 22 Rewrite the meaning of Security Audit.
- 23 Write the purpose of Disk Imaging tools.
- 24 State the role of Cryptography in Forensics.
- 25 State any two Cyber Security Laws.
- 26 Rewrite the definition of Security Assurance.
- 27 Write any two examples of Digital Devices used in Forensics.
- 28 State the purpose of Authentication in Forensics.
- 29 State any two types of Forensic Tools.
- 30 Rewrite the definition of Data Recovery.
- 31 Write the function of Encase tool.
- 32 State two features of NTFS.
- 33 Identify different sources of Electronic Evidence.
- 34 Classify various types of Internet Crimes.

Computer Forensic Question Bank

- 35 Give example of a Security Audit Standard.
- 36 Enlist any two Anti-Forensics techniques.
- 37 Identify the components of Digital Evidence
- 38 Classify Cyber Crimes based on motive.
- 39 Give example of Forensic Software Tool.
- 40 Enlist any two modules of Digital Investigation.
- 41 Identify any two Internet Crimes.
- 42 Classify Electronic Media types.
- 43 Give example of Forensic Investigation Tool.
- 44 Enlist any two methods to recover data from mobiles.
- 45 Identify any two types of Electronic Evidence.
- 46 Classify Cyber Crimes based on impact.
- 47 Give example of Digital Crime Module.
- 48 Enlist any two tools for Vulnerability Assessment.

Computer Forensic Question Bank

4 Marks

- 1 Distinguish between Hacking and Cracking.
- 2 Sketch the process of Slack Space Data Retrieval.
- 3 Write short note on Digital Image Processing in Forensics.
- 4 Write short note on Vulnerability Assessment Tools.
- 5 Examine any two Disk Imaging Tools.
- 6 Discuss the role of Cryptography in Cyber Security.
- 7 Discuss importance of Security Audit in Cyber Laws.
- 8 Illustrate the concept of Security Assurance.
- 9 Sketch the architecture of a Forensic Investigation Process.
- 10 Distinguish between FAT and EXT file systems.
- 11 Examine the functionality of Encase and FTK tools.
- 12 Distinguish between FAT and NTFS.
- 13 Examine the use of FTK Tool in Forensic Analysis.
- 14 Discuss different types of File Systems used in Windows.
- 15 Distinguish between FAT16 and FAT32.
- 16 Illustrate steps of Security Audit.
- 17 Illustrate handling procedure of Electronic Evidence.
- 18 Sketch steps in retrieving deleted data.
- 19 Examine the role of Forensic Tools in Data Recovery.
- 20 Write short note on Data Recovery.
- 21 Illustrate the process of Security Audit.
- 22 Write short note on Anti-Forensics.
- 23 Discuss the need of Digital Forensics in Cyber Crime.
- 24 Sketch the process of Digital Investigation

Computer Forensic Question Bank

7 Marks

- 1 Discuss the role of SSE-CMM in Security Assurance.
- 2 Analyse FAT and NTFS file system differences.
- 3 Describe the procedure of retrieving deleted data from mobiles.
- 4 Explain COBIT Framework for IT Governance.
- 5 Describe retrieving data from Ghosting and Compressed Files.
- 6 Examine the process of Data Recovery from Slack Space.
- 7 Discuss the challenges in handling Electronic Evidence.
- 8 Explain International Cyber Law Framework.
- 9 Explain the importance of Cyber Laws in Digital Security.
- 10 Illustrate steps in Electronic Evidence Collection.
- 11 Analyse NTFS structure with its advantages over FAT systems.
- 12 Examine usage of Slack Space in Disk Storage.
- 13 Illustrate the steps involved in Digital Forensics Process.
- 14 Examine various Forensic Tools used for Disk Imaging.
- 15 Illustrate the process of collecting and storing electronic evidence
- 16 Discuss challenges in multimedia forensics.
- 17 Explain International Security Standards such as ISO/IEC 27001.
- 18 Analyse the structure of UNIX File Systems.
- 19 Analyse the structure and use of NTFS File System
- 20 Examine Anti-Forensics techniques and counters.
- 21 Describe how deleted data is recovered from Laptops.
- 22 Describe recovery of data from compressed files.
- 23 Discuss the relevance of Web Technology in Cyber Crimes.
- 24 Illustrate steps in handling and preservation of Electronic Evidence.

Computer Forensic Question Bank

12 Marks

- 1 Describe steps of complete Digital Investigation Cycle.
- 2 Describe Data Recovery from Damaged SIM.
- 3 Describe the process of retrieving multimedia evidence.
- 4 Describe the process of retrieving multimedia and SIM data in forensics
- 5 Explain process of Disk Imaging and Data Recovery.
- 6 Explain Digital Investigation Process.
- 7 Explain Data Acquisition Techniques used in Forensics.
- 8 Explain in detail the Data Acquisition and Authentication Process.

- 9 Rewrite about following:
 - a) COBIT
 - b) SSE-CMM
 - c) Security Audit

- 10 Rewrite about following:
 - a) Electronic Media
 - b) OS Artifacts
 - c) Internet Artifacts

- 11 Rewrite about following:
 - a) IPR
 - b) COBIT
 - c) Security Laws

- 12 Rewrite about following:
 - a) Internet Crimes
 - b) Credit Card Frauds
 - c) Emerging Digital Crimes
