

Computer Forensics

1. What is digital forensics primarily concerned with?

- A. Hardware design
- B. Recovery of digital evidence
- C. Web development
- D. Data encryption

✓ Correct Answer: B

2. Which of the following is a cybercrime?

- A. Identity theft
- B. Software installation
- C. Email configuration
- D. Password update

✓ Correct Answer: A

3. The first step in digital forensics is:

- A. Reporting to police
- B. Formatting storage media
- C. Evidence identification
- D. Deleting cookies

✓ Correct Answer: C

4. Which device stores electronic evidence?

- A. Paper file
- B. Printer
- C. Hard disk

UNIT 1

D. Whiteboard

✓ Correct Answer: C

5. A hacker is someone who:

A. Repairs computers

B. Illegally accesses computer systems

C. Designs websites

D. Creates passwords

✓ Correct Answer: B

6. What is cracking?

A. Legal access to a system

B. Encrypting files

C. Illegally removing copy protection

D. Programming

✓ Correct Answer: C

7. What does ATM fraud typically involve?

A. Replacing ATM cards

B. Breaking ATMs physically

C. Skimming card details

D. Removing money manually

✓ Correct Answer: C

8. Which of the following is NOT a type of cybercrime?

A. Hacking

B. Plagiarism

UNIT 1

C. Email spamming

D. Browsing

✓ Correct Answer: D

9. What is the full form of IPR in digital forensics context?

A. Internet Protocol Range

B. Intellectual Property Rights

C. International Program Report

D. Intelligent Packet Routing

✓ Correct Answer: B

10. What does cryptography ensure?

A. Delay

B. Redundancy

C. Data security

D. File deletion

✓ Correct Answer: C

11. Which crime involves unauthorized access to computer systems?

A. Cracking

B. Hacking

C. Phishing

D. Baiting

✓ Correct Answer: B

12. Phishing is mainly used to:

A. Speed up data transfer

UNIT 1

- B. Create passwords
- C. Trick users into revealing personal info
- D. Boost internet speed

✓ Correct Answer: C

13. Which of the following is an example of digital evidence?

- A. Handwritten notes
- B. Pen drive data
- C. Paper files
- D. Printed receipts

✓ Correct Answer: B

14. A tool used for collecting digital evidence is:

- A. Paint
- B. MS Word
- C. FTK (Forensic Toolkit)
- D. Calculator

✓ Correct Answer: C

15. What does electronic media NOT include?

- A. USB drives
- B. DVDs
- C. CDs
- D. Newspapers

✓ Correct Answer: D

16. Which is used to encrypt data in cryptography?

UNIT 1

- A. Modem
- B. Password
- C. Key
- D. RAM

☒ Correct Answer: C

17. Cyberstalking is classified as:

- A. Financial crime
- B. Property crime
- C. Personal crime
- D. None

☒ Correct Answer: C

18. An emerging trend in digital crime is:

- A. Typewriting
- B. Manual theft
- C. Deepfake scams
- D. Physical vandalism

☒ Correct Answer: C

19. What is the aim of cyber forensics?

- A. Protect software licenses
- B. Investigate digital crimes
- C. Speed up browsing
- D. Play games online

☒ Correct Answer: B

UNIT 1

20. The method of gathering data from electronic devices is called:

- A. Formatting
- B. Collection
- C. Prosecution
- D. Deletion

✓ Correct Answer: B

21. What is ransomware?

- A. Backup software
- B. Data storage tool
- C. Malware that locks data for ransom
- D. Cloud storage system

✓ Correct Answer: C

22. The digital footprint can help in:

- A. Cooking
- B. Tracking cybercriminals
- C. Driving a car
- D. Buying groceries

✓ Correct Answer: B

23. What does the term 'spoofing' refer to?

- A. Formatting hard drives
- B. Encrypting passwords
- C. Faking identity or source
- D. Improving computer speed

UNIT 1

☒ Correct Answer: C

24. Which is considered a legal use of digital forensics?

- A. Destroying evidence
- B. Modifying emails
- C. Investigating cybercrimes
- D. Stealing data

☒ Correct Answer: C

25. A firewall is used for:

- A. Heating CPU
- B. Preventing data theft
- C. Formatting disks
- D. Watching movies

☒ Correct Answer: B

26. What is cyberbullying?

- A. Software update process
- B. Online harassment
- C. Operating system error
- D. Network boosting

☒ Correct Answer: B

27. A brute-force attack targets:

- A. Emails
- B. Passwords
- C. CPUs

UNIT 1

D. Graphics

✓ Correct Answer: B

28. Digital forensics helps in:

A. Creating software

B. Investigating network crimes

C. Cleaning computers

D. Selling hardware

✓ Correct Answer: B

29. A secure website uses which protocol?

A. HTTP

B. FTP

C. SMTP

D. HTTPS

✓ Correct Answer: D

30. The chain of custody ensures:

A. Fast trial

B. Evidence integrity

C. Hacking permission

D. Legal bypass

✓ Correct Answer: B
