

Unit-2

Computer Forensics

1-Mark Questions (Very Short Answer)

1. What does IPR stand for in Cyber Laws?
 2. Expand COBIT in the context of security governance.
 3. Define Security Assurance in one sentence.
 4. Mention any one international standard for information security.
 5. What is the primary objective of a Security Audit?
-

2-Marks Questions

1. Define Security Assurance in the context of cyber laws.
 2. What is Intellectual Property Rights (IPR)? Give one example.
 3. Name any two international standards used in cybersecurity.
 4. What is the role of a security audit?
 5. Expand COBIT and briefly state its purpose.
-

4-Marks Questions

1. Explain the difference between Security Assurance and Security Compliance with suitable examples.
 2. Describe the importance of cyber laws in preventing digital crimes.
 3. What are the major components of an effective Security Audit process?
 4. Write a short note on SSE-CMM and its application in cybersecurity.
 5. Discuss IPR violations in cyberspace with two relevant examples.
-

6-Marks Questions

1. Explain the objectives and features of the COBIT framework. How does it help in IT governance and cybersecurity?
2. Describe the different types of Intellectual Property Rights (IPR) and their importance in the digital world.
3. Discuss the process of conducting a security audit in an organization. What tools and standards are generally followed?
4. What is SSE-CMM (Systems Security Engineering Capability Maturity Model)? Explain its structure and relevance in digital forensics.
5. Evaluate the role of international security standards like ISO/IEC 27001 in ensuring data protection and global compliance.
