

Practice Quiz: What do you think?

Practice Assignment • 5 min

Question 1 of 1 [Exit](#)

1. Recall the components of the problem statement that you reviewed earlier. Then select the option that you think would be an appropriate problem statement for Georgia.

1 / 1 point

Which option could be Georgia's problem statement?

- ☐ Georgia's team downsized unexpectedly causing a shortage of people to handle the workload.
- ☒ Georgia's team of five people must process 200 expense claims by the end of the month. It's now the 15th of the month, and the team will soon have only three people available to do the work.

Correct. This Option is a good example of a problem statement as it includes all key information about "who," "when," "where," and "what" and does not get into the situation's causes such as "why" and "how."

- ☐ Georgia was wrong to approve the leave of one person in her team when the workload is expected to be high.

Practice Quiz: What do you think?

Practice Assignment • 3 min

Question 1 of 1 [Exit](#)

1. Which option best describes “The 5 Whys” questioning technique?

1 / 1 point

- ☐ Ask five people involved in the problem why they think it occurred.
- ☐ Ask the following:
 - Why the problem occurred.
 - Why it happened now.
 - Why it must be solved.
 - Why others haven’t solved it already.
 - Why you are involved.

☒ Ask “Why?” repeatedly at least five times until you get to the root cause.

The best answer is to continue asking “Why?” at least five times until you get to what we call the root cause. This uncovers the fundamental cause that created the problem.

☐ Ask a different person why the problem occurred, each day for five days.

Practice Quiz: The "5 Whys" for Georgia

Practice Assignment • 20 min

Question 1 of 5

[Exit](#)

1. First Why: Why can't Georgia's team process 200 expense claims by 31 December?

1 / 1 point

- ☐ Because the team doesn't have experienced people.
- ☐ Because the team isn't fast enough.
- ☒ Because there are fewer people than needed to process the claims.

Georgia's team can't complete the task because there are fewer people than needed for the task. The team's experience or speed is not an issue here.

[← Previous](#)

Practice Quiz: The "5 Whys" for Georgia

Practice Assignment • 20 min

Question 2 of 5 [Exit](#)

2. Second Why: Why are there fewer people than needed to process the claims?

1 / 1 point

- ☐ Because only a handful of team members care about the work.
- ☐ Because the other team members are unprofessional.
- ☒ Because a person took unplanned leave.

Because a person took unplanned leave, there are fewer people than needed to process the claims. It doesn't have anything to do with the team's professionalism or attitude towards work.

Practice Quiz: The "5 Whys" for Georgia

Practice Assignment • 20 min

Question 3 of 5 [Exit](#)

3. Third Why: Why did the unplanned leave affect the work?

1 / 1 point

- ☐ Because the work wasn't planned properly.
- ☒ Because there was no backup plan for such an event.

Because there was no backup plan, the unplanned leave affected the work. It was not due to lack of planning the work or one person handling critical tasks.

- ☐ Because the person who took unplanned leave was handling certain critical tasks.

Practice Assignment • 20 min

Question 4 of 5 [Exit](#)

4. Fourth Why: Why was there no backup plan?

1 / 1 point

- ☐ Because the team has never needed a backup plan.
- ☐ Because Georgia didn't think of a backup plan.
- ☒ Because the team was confident of completing the work even with fewer hands than needed.

The team was confident of completing the work even with fewer hands and hence didn't require a backup plan. It was not because they didn't think of a backup plan or that they never needed it.

Practice Assignment • 20 min

Question 5 of 5 [Exit](#)

5. Fifth Why: Why is the team no longer confident of completing the work?

1 / 1 point

- ☐ Because Georgia doubts the team's ability to complete the task.
- ☐ Because some of the team members are feeling stressed.
- ☒ Because the team has received a higher volume of claims than expected.

Because the team has received a higher volume of claims than expected, they are no longer confident of completing the work. It's not due to Georgia doubting the team's ability or any stress felt by the team.

Exit

1. If time is of essence, who should choose the solution?

1 / 1 point

☒ One person.

When time is the most important factor, one person should be allowed to make a choice because you need to make a quick decision.

☐ One person who consults with advisors and stakeholders.

☐ A team that reaches consensus.

2. If quality is critical, who should choose the solution?

1 / 1 point

☐ One person.

☒ One person who consults with advisors and stakeholders.

When quality is the most important factor, one person should consult with advisors and stakeholders before choosing the right solution.

☐ A team that reaches consensus.

3. If buy-in is important, who should choose the solution?

1 / 1 point

☐ One person.

☐ One person who consults with advisors and stakeholders.

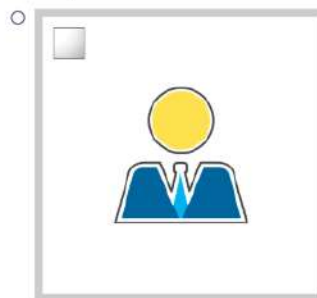

☒ A team that reaches consensus.

When buy-in is the most important factor, it's important that people reach a consensus on the decision.

One person

One person who consults with advisors and stakeholders

Practice Quiz: Using the Ease and Effectiveness Matrix

Practice Assignment • 10 min

1. View the Ease and Effective Matrix below to assign the given solutions to the specific quadrant. 1 / 1 point

Solution 1: Begin the first workshop with five participants to start the skill-building process. Assign the solution to the specific quadrant.

- ☐ Quadrant 1
- ☐ Quadrant 2
- ☐ Quadrant 3
- ☒ Quadrant 4

Keep in mind:

Conducting the workshop now won't be cost-effective and the discussions during the workshop won't be robust.

Practice Quiz: Using the Ease and Effectiveness Matrix

Practice Assignment • 10 min

Question 2 of 4 [Exit](#)

2. **Solution 2:** Reschedule the workshop to a later date when there are a minimum of nine participants.

1 / 1 point

- ☐ Quadrant 1
- ☐ Quadrant 2
- ☒ Quadrant 3

Keep in mind:

It factors in high workloads and makes room for participants to manage work and attend the workshop. This seems to be the best available solution given all the constraints.

- ☐ Quadrant 4

Practice Quiz: Let's use the Ease and effectiveness matrix for Georgia's problem

Practice Assignment • 10 min

1. View the Ease and Effective Matrix below to assign the given solutions to the specific quadrant.

1 / 1 point

Solution 1: Get resources from other teams to help out.

- ☐ Quadrant 1
- ☒ Quadrant 2

The solution in Quadrant 2 suggests that Georgia get resources from other

Practice Quiz: Let's use the Ease and effectiveness matrix for Georgia's problem

Practice Assignment • 10 min

2. **Solution 2:** Finish as much as possible with the given resources.

1 / 1 point

- ☐ Quadrant 1
- ☐ Quadrant 2
- ☐ Quadrant 3
- ☒ Quadrant 4

The solution in Quadrant 4 suggests that Georgia should finish as much work as possible with the given resources. This solution may be easy to implement but not effective. Georgia will have to process 200 expense claims by 31 December. There is no option of keeping the expenses pending.

3. **Solution 3:** Allow the person caring for her child to work from home on a part-time basis.

1 / 1 point

- ☒ Quadrant 1

Quadrant 1 would be correct in this case. Having someone work from home would be easy to implement and also high in its effectiveness.

- ☐ Quadrant 2
- ☐ Quadrant 3
- ☐ Quadrant 4

4. **Solution 4:** Ask the three people in the team to work more hours by working late and over the weekends and holidays.

1 / 1 point

- ☐ Quadrant 1
- ☐ Quadrant 2
- ☒ Quadrant 3

The solution in Quadrant 3 is correct in this case. Asking people to work overtime on holidays and weekends would be difficult to implement and low in effectiveness.

- ☐ Quadrant 4

Practice Quiz: What do you think success will look like?

Practice Assignment • 5 min

Question 1 of 1 [Exit](#)

1. What do you think is the first part of implementing a solution?

1 / 1 point

- ☐ Identifying the important contributors and giving them recognition.
- ☐ Preventing the problem from happening again.
- ☒ **Designing a way to measure how well the solution works.**

The first part of implementing a solution is to measure it. Start by planning how you'll measure the solution. This may help you uncover details about the solution that you might not have thought of before - details that can help you implement your solution well. And it will help you build the measurement into your plan from the beginning so it doesn't get overlooked.

- ☐ Identifying those who caused the problem and punishing them.

Practice Quiz: What do you think?

Practice Assignment • 10 min

Question 1 of 3

[Exit](#)

1. The first thing you should do is establish the success criteria. In Georgia's scenario, what would constitute success?

1 / 1 point

Select all that apply.

- ☒ A) Her team processes all the expense claims within the deadline.

Options A and D directly achieve Georgia's goal of her team accurately processing 200 expense claims by the end of the month. As for option B, Georgia's team working extra hours is probably a necessary part of the solution, but it's not the goal. And with option C, adding a backup in all her team's plans might be a good side effect of the solution, but it's not the goal.

- ☐ B) Her team works extra hours.
- ☐ C) She adds a backup in all her team's plans.
- ☒ D) Her team accurately completes the work.

Options A and D directly achieve Georgia's goal of her team accurately

[← Previous](#)[Skip](#)[Next →](#)

Practice Quiz: What do you think?

Practice Assignment • 10 min

Question 2 of 3 [Exit](#)

2. Once you've established the success criteria, you should decide what to measure. What aspects should you measure to test how successful your solution is to Georgia's problem?

1 / 1 point

Select all that apply.

- ☐ A) How well her manager evaluates her ability to resolve the situation.
- ☒ B) How many expense claims her team processes within the deadline.

Option A involves too many factors outside this problem and its solution. While option C is probably part of the solution, it's not the goal. However, options B and D can determine if Georgia was successful in meeting her goal of the team accurately processing 200 expense claims within the deadline.

- ☐ C) How many extra hours her team works.
- ☒ D) How accurately her team does the work.

[← Previous](#)[Skip](#)[Next →](#)

Practice Quiz: What do you think?

Practice Assignment • 10 min

Question 3 of 3 [Exit](#)

3. And lastly, after deciding what to measure, you should determine how you will measure it. How will you measure if the solution to Georgia's problem meets her goal successfully?

1 / 1 point

Select all that apply.

- ☒ A) Count the number of expense claims processed by the end of the day on 31 December.

Options A and B directly measure if the solution to Georgia's problem meets her goal, which is the team accurately processing 200 expense claims within the deadline. Option C is incorrect as only the end-of-the-month performance counts. Similarly, option D is not a measure of success. After all, Georgia's team could work extra hours and still not accurately process the expense claims on time.

- ☒ B) Count the number of inaccurate expense claims processed by the end of the day on 31 December.

Options A and B directly measure if the solution to Georgia's problem meets her goal, which is the team accurately processing 200 expense

Question 1 of 2 [Exit](#)

Practice quiz assessment

1. Ashlee has been working as the sole tax accountant on her team for five years. Recently, there's been a sudden increase in her workload, and this is expected to last. John, another specialist in tax accounting, has just been hired to help.

1 / 1 point

John and Ashlee often need to collaborate. However, soon Ashlee realizes that this is going to be tough because they have different working styles. John tends to wait until the last minute to get his work done. Ashlee, on the other hand, is methodical.

Ashlee feels that she now has to worry about both his work and her own. While working on joint projects, she is not happy to wait until an hour or so before a deadline when they are forced to collaborate.

Since John is new to the department, he is not comfortable with the conflict. Their supervisor, Anna, feels that the conflict is affecting the quality of their work. Which technique should Anna use to resolve the problem?

- ☒ [Corrective solution.](#)
- ☐ Contingent solution.
- ☐ Interim solution.
- ☐ Preventive solution.

[← Previous](#)[Skip](#)[Next →](#)

~ Contingent solution.

☐ Interim solution.

☐ Preventive solution.

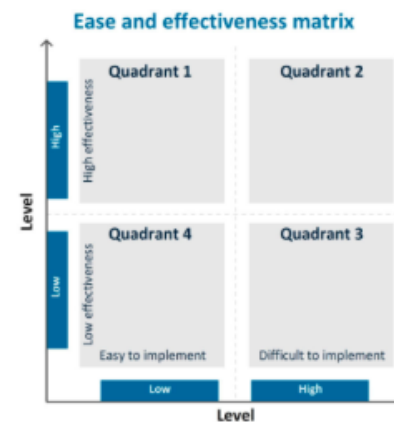

2. Zach is a sales lead with the Cloud Solutions Sales Team. He, along with his team, is taking part in a quarterly sales challenge. Seven different business units are contending for the champion's trophy. The team with the highest revenue at the end of the quarter will be declared the winner.

1 point

Zach and his team need to use their time and effort efficiently in order to get the best returns from the existing clients and win the challenge.

Listed below is an existing client that Zach deals with. Read the descriptions carefully and help Zach categorize the client and draw up a winning strategy with the help of the Ease and effectiveness matrix.

View the Ease and Effective Matrix below to assign the given solution to the specific quadrant.

Client D is one of the team's first clients. Deals with this client were profitable initially but the returns have diminished with time.

- ☒ Preventive solution.
- ☒ Adaptive solution.
- ☒ Corrective solution.

2. Ainsley is a sales trainer with the ERP optimization team. He is currently responsible for training new hires for up-selling and cross-selling opportunities from the existing portfolio of ERP services. The new hires are responsible for the following:

4 points

- Reducing the cost of customer acquisition.
- Enhancing customer retention rates.
- Reducing the sales cycle.

Ainsley has developed a 3-day training program for all the new hires. The program includes situations a sales rep would encounter in the real world while engaging with customers. Ainsley is responsible for tracking the success criteria for the training program. In Ainsley's scenario, what would constitute success?

Select all that apply.

- ☐ There was no technical glitch during the training session.
- ☒ Selling opportunities increased by more than 5%.
- ☒ The sales cycle reduced by at least a month.

Graded Quiz: Solving Problems with Critical and Creative Thinking

3. Brian from the Service Oriented Architecture (SOA) team has planned to run 30 roadshows in Q2. The goal is to bring together the SOA community in-person in order to exchange ideas on how to increase the sales volume, help the organization generate leads for its tools and solutions, and drive customer referrals.

4 points

Brian also wanted the SOA community to stay connected online before and after the roadshows. So, his team used social media to promote the event as well as to help participants stay connected.

What aspects should Brian measure to test how successful his campaign was?

Select all that apply.

- ☐ How much experience he gains on organizing roadshows.
- ☒ How well he stays within the budget.
- ☒ Percentage increase from previous sales baselines.
- ☒ The likeliness of a customer referring Brian's team to others using NPS.
